### Summary of Test Results

#### 1. CPSIA Prohibition on Sale of Certain Products Containing Specified Phthalates: STR SOP TP0173

**Criteria:** Permanent ban: Children's toys or child care articles that contain concentrations of more than 0.1 percent of DEHP, DBP, or BBP are banned, effective Feb. 10, 2009. Interim ban: Children's toys that can be placed in a child's mouth or child care articles that contain concentrations of more than 0.1 percent of DINP, DIDP, or DnOP are banned for an interim period (pending an investigation by the chronic hazard advisory panel), effective Feb. 10, 2009, and until a final rule is promulgated by the CPSC. Children's toy means a consumer product designed or intended by the manufacturer for a child 12 years of age or younger for use by the child when the child plays. Child care article means a consumer product designed or intended to facilitate sleep or the feeding of children age 3 and younger, or to help such children with sucking or teething. Toy that can be placed in a child's mouth is one in which any part of the toy can actually be brought to the mouth and kept in the mouth by a child so that it can be sucked and chewed. If the children's product can only be licked, it is not regarded as able to be placed in the mouth. If a toy or part of a toy in one dimension is smaller than 5 cm, it can be placed in the mouth.
